

Qutenza[®]

(capsaicin) 8% topical system

For people with diabetes who have nerve pain of the feet

Actor portrayals.

QUTENZA is not indicated for patients under 18 years of age.

UP TO **3** MONTHS OF PAIN RELIEF

JUST **4** TREATMENTS EACH YEAR

QUTENZA may not be repeated more frequently than every 3 months.

INDICATION

QUTENZA[®] (capsaicin) 8% topical system is indicated in adults for the treatment of neuropathic pain associated with postherpetic neuralgia (PHN) and for neuropathic pain associated with diabetic peripheral neuropathy (DPN) of the feet.

IMPORTANT SAFETY INFORMATION

- Treatment with QUTENZA must be performed only by a healthcare provider. Never apply or remove QUTENZA yourself.

Please see additional Important Safety Information on pages 10-11.

Understanding diabetic nerve pain of the feet

Common symptoms include:

Burning pain

Shooting or stabbing pain, or a feeling of walking on broken glass

Tingling, foot numbness, or a feeling of pins and needles

Talk to your doctor about your pain

Still experiencing pain with your current medications? Talk to your healthcare provider about the pain you're feeling and how it may be impacting your day to day – QUTENZA may be able to help.

“Most of my patients have already tried some type of oral medications, but many still have unresolved pain. QUTENZA can really address this unmet need and help patients with painful diabetic peripheral neuropathy of the feet.”

Gary Graf, APRN

IMPORTANT SAFETY INFORMATION (cont)

- Do not touch QUTENZA or items exposed to capsaicin. Touching QUTENZA and then accidentally touching other areas of your body can cause severe irritation of eyes, mucous membranes, respiratory tract, and skin.

Please see additional Important Safety Information on [pages 10-11](#).

QUTENZA is different from other treatments you may have tried

First and only noninvasive, in-office treatment that treats diabetic nerve pain of the feet at the source of pain

One 30-minute application provides up to 3 months of pain relief – that's ~2 hours of treatment time for year-long, ongoing relief

No known drug-drug interactions and can be used alone or with other medications

It's more than a patch; **QUTENZA** is the only FDA-approved topical system that delivers relief for diabetic nerve pain of the feet.

Watch [this video](#) to see how QUTENZA is applied in-office by a healthcare provider.

Designed to be different: QUTENZA targets and treats at the source of pain for up to 3 months

01

The cycle of diabetic nerve pain relief

Damaged nerves send too many pain signals to your brain, resulting in pain in your feet.

02

Targeted prescription-strength patch

During a 30-minute treatment, the medicine travels to the damaged nerves in your feet.

03

Reduces pain signals

QUTENZA reaches these damaged nerves and helps reduce the number of pain signals sent to your brain.

04

Nerve regrowth

Over time, the nerves in your feet regain the ability to send out pain signals, causing pain to return.

Due to the chronic nature of diabetic nerve pain of the feet, ongoing treatments with QUTENZA every 3 months* may be necessary to achieve optimal benefit.

*QUTENZA may not be repeated more frequently than every 3 months.

IMPORTANT SAFETY INFORMATION (cont)

- Do not touch your eyes or other unintended target areas during the QUTENZA application. QUTENZA is not for use near eyes or mucous membranes. Do not sniff or inhale near QUTENZA as this may cause you to cough or sneeze. If irritation of eyes or airways occurs or any side effects become severe, notify your doctor immediately.

Please see additional Important Safety Information on pages 10-11.

Successful treatment with QUTENZA starts with setting realistic goals

Everyone is different.

Some people may find pain relief after the first treatment, while others may need multiple treatments. Before starting QUTENZA, talk to your healthcare provider about what to expect over the first few treatments.

Pain relief

Are you starting to experience pain relief?

Impact on day-to-day activities

With less pain, have you seen any improvement in your ability to take part in day-to-day activities (time with family, socializing with friends, sleeping, cooking, or doing household chores)?

“I was looking forward to the next treatment. I wanted to see what it could do. As the treatments progressed, my feet felt better.”

Anthony, a real QUTENZA patient, after 8 treatments.

Individual results may vary.

IMPORTANT SAFETY INFORMATION (cont)

- You may experience substantial pain during the treatment. Tell your healthcare provider if you are experiencing pain; a cool compress or medicine for the pain can be provided to help lessen your discomfort. You may get frostbite if you cool your skin too much.

IMPORTANT SAFETY INFORMATION (cont)

You can use a cooling pack from the refrigerator (not the freezer) and avoid putting it directly on skin.

Please see additional Important Safety Information on pages 10-11.

Talk to your healthcare provider about the pain you're experiencing

Could diabetes be causing pain in my feet?

What treatments are available?

What other treatments can we consider since I'm still having pain in my feet?

What are the benefits and risks of different treatments?

It's important that you share how diabetic nerve pain is affecting your daily activities.

Ask your healthcare provider if QUTENZA could be right for you

Is it possible that QUTENZA could help my symptoms?

How does it work?

How long does it take to work?

How long does pain relief last?

Are there side effects from the treatment?

Would you be open to trying QUTENZA to see if it works for me?

Visit [QUTENZA.com](https://www.qutenza.com) to find a QUTENZA specialist near you.

IMPORTANT SAFETY INFORMATION (cont)

• QUTENZA can cause serious side effects, including pain, severe burns, and increases in blood pressure during or right after treatment. Your healthcare provider should check your blood pressure during treatment with QUTENZA. If you have high blood pressure that is not well controlled by medicine, or have had recent heart problems, stroke, or other vascular problems, you may be at increased risk and should discuss with your doctor whether QUTENZA is right for you.

Please see additional Important Safety Information on pages 10-11.

You could pay as little as \$0 for your QUTENZA treatment

My QUTENZA Connect Cost Savings Program may help cover costs related to treatment with QUTENZA.

QUTENZA MEDICATION SAVINGS

You may pay as little as \$0 for your prescription. Up to \$5,000 annual savings.

\$0*

*Terms and conditions may apply.

INDICATION

QUTENZA[®] (capsaicin) 8% topical system is indicated in adults for the treatment of neuropathic pain associated with postherpetic neuralgia (PHN) and for neuropathic pain associated with diabetic peripheral neuropathy (DPN) of the feet.

IMPORTANT SAFETY INFORMATION

- Treatment with QUTENZA must be performed only by a healthcare provider. Never apply or remove QUTENZA yourself.
 - Do not touch QUTENZA or items exposed to capsaicin. Touching QUTENZA and then accidentally touching other areas of your body can cause severe irritation of eyes, mucous membranes, respiratory tract, and skin.
 - Do not touch your eyes or other unintended target areas during the QUTENZA application. QUTENZA is not for use near eyes or mucous membranes. Do not sniff or inhale near QUTENZA as this may cause you to cough or sneeze. If irritation of eyes or airways occurs or any side effects become severe, notify your doctor immediately.
 - You may experience substantial pain during the treatment. Tell your healthcare provider if you are experiencing pain; a cool compress or medicine for the pain can be provided to help lessen your discomfort. You may get frostbite if you cool your skin too much. You can use a cooling pack from the refrigerator (not the freezer) and avoid putting it directly on skin.
- QUTENZA can cause serious side effects, including pain, severe burns, and increases in blood pressure during or right after treatment. Your healthcare provider should check your blood pressure during treatment with QUTENZA. If you have high blood pressure that is not well controlled by medicine, or have had recent heart problems, stroke, or other vascular problems, you may be at increased risk and should discuss with your doctor whether QUTENZA is right for you.
 - Seek medical attention if you experience strong and continuous pain or skin lesions such as blisters after treatment.
 - Tell your doctor if you have reduced sensation in the feet. You may notice that you have less feeling for hot or sharp pain where QUTENZA was applied, but this is usually minor and temporary.
 - Treated areas may be sensitive to heat (e.g., hot water, direct sunlight, vigorous exercise) for a few days after treatment.

The most common side effects of QUTENZA are redness, pain, or itching where QUTENZA was applied. You should tell your doctor if any side effects bother you or do not go away.

To report suspected adverse reactions, contact Averitas Pharma, Inc. at 1-877-900-6479 (Option 1) or FDA at 1-800-FDA-1088 or www.fda.gov/medwatch.

For more information, ask your healthcare provider or pharmacist.
